Professional Summary

DevOps Engineer with over 6 years of experience in designing, implementing, and maintaining large-scale infrastructure for major telecom operators. Proven expertise in containerization, CI/CD automation, cloud technologies, and infrastructure as code. Successfully managed 5,000+ computing resources across 10+ data centers, with strong proficiency in Kubernetes orchestration, Linux system administration, monitoring, and enterprise solution architecture—focused on delivering optimization and scalability.

Core Competencies

Kubernetes • Docker • OpenShift Cloud-native • RHEL • SLES Ansible • Metrics • Git Nginx • Redis • SQL	CI/CD Pipelines • Jenkins • GitLab Python • Bash Scripting • APIs PostgreSQL • Prometheus • Zabbix ELK Stack • Log Management	Infrastructure as Code • streamline Cloud Computing • Virtualization Container Orchestration • Microservices Performance Tuning • Scalability
---	--	--

Technical Skills

- **Operating Systems:** Linux Administration, SLES, RHEL, Ubuntu, System Administration
- **Container Technologies:** Kubernetes, OpenShift, Rancher, Docker, Docker Swarm, Container Orchestration
- **Programming Languages:** Python, Bash Scripting, Shell Scripting, RESTful API, SOAP API Development
- **DevOps Tools:** Ansible, Git, GitLab, Jenkins, Infrastructure as Code
- **Monitoring & Logging:** ELK Stack, Prometheus, Grafana, Zabbix, Log Management, Performance Monitoring
- **Cloud & Virtualization:** VMware, Cloud Computing, Distributed Systems, Microservices Architecture
- **Storage Systems:** Ceph Storage, Backup Solutions, Disaster Recovery
- **Hardware:** HPE ProLiant & Fujitsu Servers, Huawei Equipment, Data Center Management

Professional Experience

InfraDevOps Engineer / OS Expert Apr 2025 – Present
MCI - Hamrahe Aval (Major Telecom Operator) Tehran

- Manage 5000+ computing resources (physical and virtual servers) for cellular operator's enterprise infrastructure
- Maintain 99.9% system uptime and Service Level Agreement (SLA) compliance across 10+ data centers
- Implement automated CI/CD pipelines reducing software deployment time by 60% using Jenkins and GitLab
- Provide critical DevOps support for software development and telecom core network teams
- Design and implement infrastructure as code solutions for consistent environment provisioning

Infrastructure DevOps Team Leader Feb 2023 – Dec 2024
Huawei Technologies Co., Ltd. Tehran

- Led enterprise-wide digital transformation migrating from VM-based to container-based infrastructure using Kubernetes
- Supervised hardware installation & configuration across 3 geo-located sites achieving zero downtime during transition
- Managed containerized workloads scaling from 500 to 2000+ instances with excellent orchestration and load balancing
- Oversaw 250+ bare-metal servers using Ansible automation tools, Prometheus and Zabbix monitoring solutions
- Successfully delivered all project deliverables within Performance Improvement Plan timeframe and budget constraints

DevOps Engineer Aug 2019 – Feb 2023
Huawei Technologies Co., Ltd. Tehran

- Maintained 1000+ production virtual machine nodes in cloud environment achieving 99.99% availability
- Developed Python-based log analysis solutions for Network Elements (NEs) post cyber-security checks
- Optimized system upgrade processes and patch management for enterprise-grade telecom infrastructure
- Developed expertise in application troubleshooting: Nginx web servers, Redis caching systems, & SQL/PostgreSQL databases

Key Projects & Achievements

Enterprise Infrastructure Modernization	2025
• Delivered consistent computing resource provisioning for various services using Infrastructure as Code (IaaS) • Reduced development bottlenecks by 40% by implementing local GitLab infrastructure and automated workflows • Created standardized documentation and onboarding processes improving team efficiency by 60% • Refined comprehensive testing frameworks for deployment scripts improving reliability by 75%	

Container Migration Initiative	2024
• Led large-scale infrastructure modernization project migrating 2000+ workloads from VMs to Kubernetes containers • Achieved 35% infrastructure cost reduction while keeping best practices of a product life cycle and better resource usage • Implemented automatic workflows and Continuous Integration/Continuous Deployment best practices • Designed microservices architecture enabling better application scalability and fault tolerance	

Multi-Site Disaster Recovery Implementation	2023
• Designed and guided failover mechanisms across 3 data centers with RPO/RTO under 15 minutes • Applied cross-site data replication solutions using custom backup scripts and distributed storage systems • Achieved 99.99% system availability during peak traffic periods, guaranteeing quality assurance of the services	

Education

Bachelor of Science in Electrical Engineering, Telecommunications	2013 – 2018
Qom University of Technology	

Relevant Coursework: Digital Communications, Computer Networks, Network Security, Python Programming, Embedded Systems, Wireless Communication Systems, Digital Signal Processing, Control Systems, Operating Systems, Database Management

Certifications & Professional Development

• Git Version Control & Jenkins – In Progress (Linux House Fanavarn Anisa, 2025) • Ceph Storage System Administration – In Progress (Linux House Fanavarn Anisa, 2025) • Advanced Docker Containerization, Kubernetes, OpenStack Cloud (Linux House Fanavarn Anisa, 2021, 2023) • LPIC-1 Linux System Administrator & LPIC-2 Advanced Linux Professional (Linux House Fanavarn Anisa, 2019, 2021) • Advanced Python Programming for DevOps (Linux House Fanavarn Anisa, 2020) • ISO 27001 Information Security Management & ISO 45001 Occupational Health Safety (PPAK, 2022)	
---	--

Soft Skills

• Demonstrated cross-functional collaboration, team-oriented, and an effective communicator to deliver projects • Applied a continuous improvement mindset, remained results-driven, and exercised strong time management • Ownership of decisions with an analytical mindset and a detail-oriented approach to ensure accuracy • Acted decisively under pressure, with assertiveness, while being responsible and trustworthy in all tasks	
---	--

Languages

• Persian (Farsi): Native Speaker • English: Professional Working Proficiency - Technical Documentation, Communication • Dutch: Beginner Level (Self-study, Duolingo)
